Administration of Medication During School Hours

The administration of prescribed medication to a student during school hours will be permitted when failure to take such medication would jeopardize the health of the student or the student would not be able to attend school if the medicine were not administered during school hours. The school nurse or parent may administer medication during school hours with permission for self-administration for life threatening medical conditions. The policy for the administration of medication during school hours is as follows:

1. A written request must be completed and returned to the school nurse for the administration of medication authorized by the physician as requested by parent/guardian (I. Parent/Guardian Authorization), relieving the Board of Education and its employees of liability for administration of medication.
2. A written request must be completed and returned to the school nurse by the prescribing physician detailing the name of medication, diagnosis, dosage, form, time of administration, duration of treatment, and side effects (II Physician's authorization).
3. Permission may be granted to a student for self-administration of medication for asthma or other potentially life-threatening illnesses (i.e.: inhalers, Epi-pens, Glucagon, etc.) provided the parent/guardian and physician authorizations are completed, including written certification regarding the student's condition and that the student is capable and has been instructed in self-administration of the medication.
4. The district shall incur no liability as a result of an injury arising from the self-administration of medication by the student.
5. The medication must be brought to the school nurse in a container properly labeled with physician's name, child's name, drug, expiration date, and dose schedule by prescribing physician or pharmacy. The nurse may verify prescribed medication with the physician.
6. The school physician may review the medication orders of the private physician.
7. Parent/guardian must contact the school nurse regarding field trips and/or individual student health/medical conditions that may necessitate immediate medical intervention, including the administration of medication (i.e.: Epi-Pen, inhaler, insulin, glucagons, etc.). The physician must complete the appropriate section of the physician's authorization for administration of medication (II Physician's authorization).
